

Introducing ... a new green way to provide self-powered lighting.

SPOT

Solar Powered On-site Tower

SPOT is THE portable lighting alternative to traditional diesel-powered units. You can count on SPOT—the ready, reliable and renewable way to shine a light. Unlike diesel light towers that burn fuel, create emissions, generate high levels of noise, and require regular refueling, the SPOT portable light tower is:

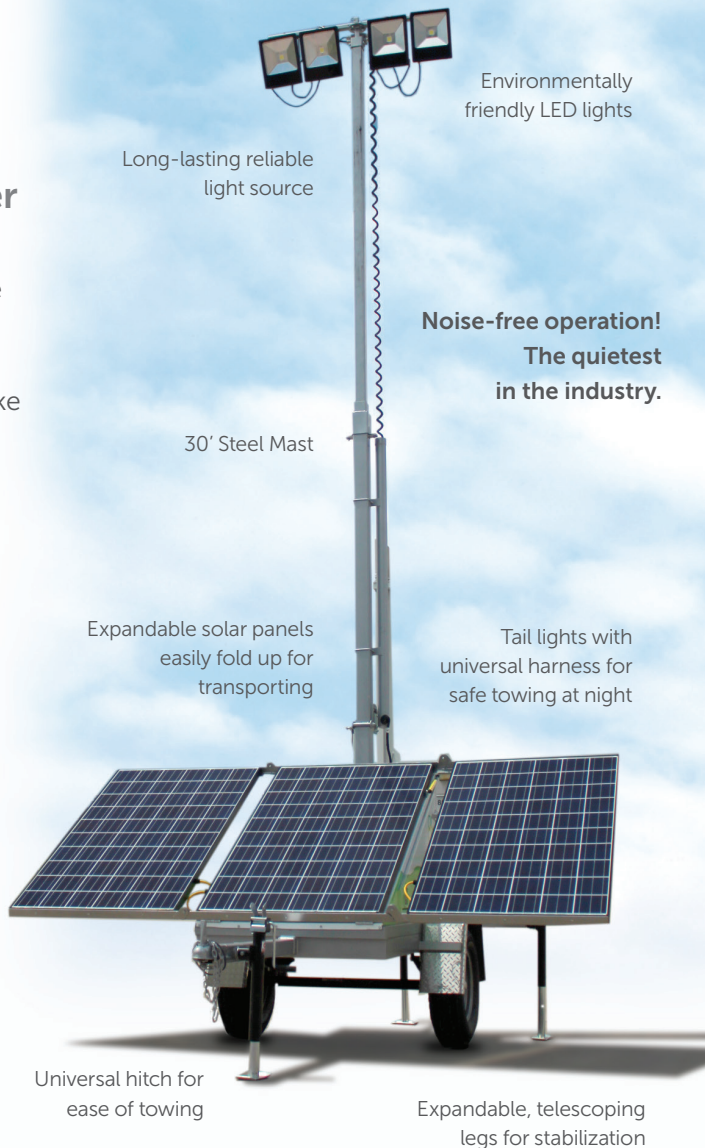

- Green and clean
- Noise-free
- Portable
- Mobile
- Low maintenance
- Self-powered

SPOT, the portable solar light tower, is the **ONLY** alternative to diesel light towers.

spotTM

A portable green lighting solution.
